## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-10 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or make obvious a drive control system for braking an electric motor, comprising: an integrated armature short-circuit brake having a first delay time, a mechanical brake having a second delay time which is longer than the first delay time, and a controller simultaneously applying a control signal to the integrated armature short-circuit brake and the mechanical brake at an activation time for immediately stopping the electric motor in the event of a malfunction which prevents a controlled slow-down of the electric motor, wherein the armature short-circuit brake is disengaged when a thermal load limit for the electric motor or the controller has been reached.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
